

SV-2 *DS*

Automatic Parts Cleaner

High-quality cleaning of small parts in environmentally friendly solvents. Probably the smallest full vacuum system in the market with all features of high performance machines. Very low operating cost by machine internal solvent regeneration.

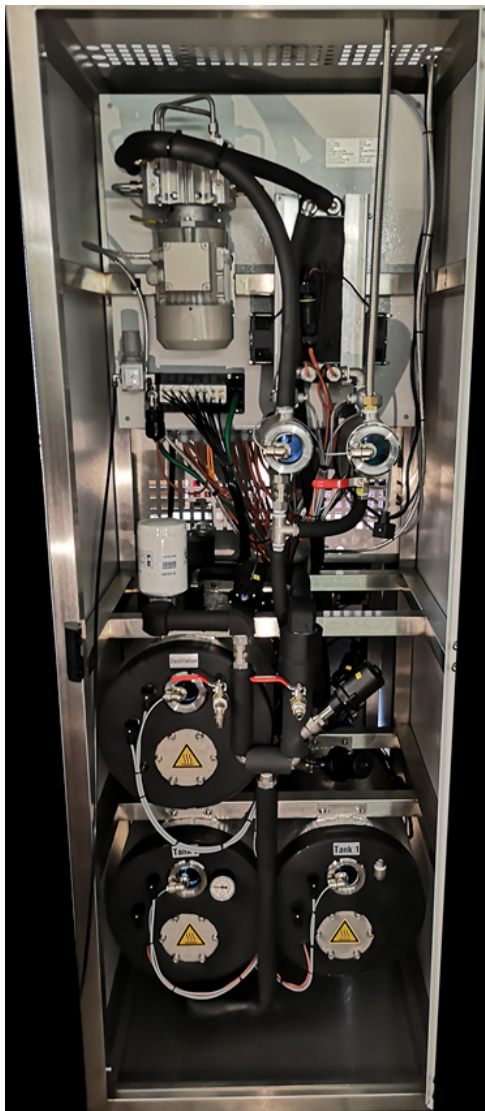

- **Valid Cleaning Process**
- **Simple Operation**
- **Flexibile Configuration**
- **Low Cost**

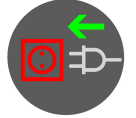

The perfect Solution rising your Productivity:

- Solvent based cleaning under full vacuum (Hydrocarbons, Modified Alcohols or Halogenated Solvents)
- Excellent cleaning results by using full range process as dipping, flooding, ultrasonic, vapor degreasing, vacuum drying by standard
- Very small machine footprint (less than an euro pallet)
- Suitable for single parts as well as bulk goods offering short cycle times
- Variable basket movement (turning, swinging, speed and angle individually programmable)
- Gearless High Torque Basket Drive with precise Encoder
- Operation friendly top loading system without risk of solvent accident
- Vapor Injection Process (VIP) for extremely low energy consumption
- Low Emission due to integrated refrigerant free cooling technology
- Basically maintenance free main components as pumps, heaters or drives
- Effective and easy to maintain particle separation
- Steam and cooling water free operation - just 400V/3PH/16A Plug needed
- PLC Control of the latest generaton with Touch Panel, internet capable
- High quality system components from established manufacturers

High-Cleaning Performance

Plug&Play

Waste water free

Internal Recycling

No Freon

Maintenance friendly

Options:

- Automatic Loading/Unloading
- Conveyor technology
- Corrosion Protection
- Baskets and Accesories
